3.2 "Transport Carrier XX" acts as a transport service provider on behalf of KEMSA for purposes of transport and delivery of LLINs to designated facilities. This agreement defines the respective responsibilities of both KEMSA and "Transport Carrier XX" in the areas mentioned in 1.1 above.

B: SECURITY OF GOODS ON TRANSIT

1.1 The intention of the Service Level Agreement (SLA) is to explain the responsibility in the following areas:

- Insurance for commodities
- Loss or damage in transit
- Recovery

The transporter shall provide transport services to KEMSA but throughout the process the ownership of the goods remains with KEMSA.

The transporter is required to ensure the safety of goods under their care and insure them against all risks while in their custody with a proper “cover”.

The transporter shall be liable and shall fully pay KEMSA for any claims for goods lost or damaged while in their possession.

GPS REQUIREMENTS

7.1 All vehicles engaged for transportation of LLINs from KEMSA warehouses should have GPS transmitters on board. The transporter shall ensure that KEMSA has visibility of all vehicles engaged for transportation at all times. This requirement shall also be applicable to sub-contracted vehicles used by outsourced carriers as well. Acquisition and maintenance cost of the tracking devices is the responsibility of the transporter.

7.2 The Authority shall install an electronic Padlock on the transporter’s delivering vehicle. The transporter’s crew shall be responsible for managing the device while in transit and shall be held liable for damage or loss of the device.

SECTION 8: E-POD APP UTILIZATION

The transporter shall equip their drivers with smartphones which KEMSA shall install the e-POD app to ensure real-time upload of delivered LLINs.

SECTION V - ACTIVITY SCHEDULE

Objectives

The objectives of the Activity Schedule are

- a) to provide sufficient information on the quantities of Services to be performed to enable Tenders to be prepared efficiently and accurately; and
- b) when a Contract has been entered into, to provide a priced Activity Schedule for use in the periodic valuation of Services executed.

In order to attain these objectives, Services should be itemized in the Activity Schedule in sufficient detail to distinguish between the different classes of Services, or between Services of the same nature carried out in different locations or in other circumstances which may give rise to different considerations of cost. Consistent with these requirements, the layout and content of the Activity Schedule should be as simple and brief as possible.

Day work Schedule

A Day work Schedule should be included only if the probability of unforeseen work, outside the items included in the Activity Schedule, is high. To facilitate checking by the Procuring Entity of the realism of rates quoted by the Tenderers, the Day work Schedule should normally comprise the following:

- a) A list of the various classes of Services, labor, materials, and plant for which basic day work rates or prices are to be inserted by the Tenderer, together with a statement of the conditions under which the Service Provider will be paid for services delivered on a day work basis.
- b) Nominal quantities for each item of Day work, to be priced by each Tenderer at Day work rates as Tender. The rate to be entered by the Tenderer against each basic Day work item should include the Service Provider's profit, over heads, supervision, and other charges.

Provisional Sums

The estimated cost of specialized services to be carried out, or of special goods to be supplied, by other Service Providers should be indicated in the relevant part of the Activity Schedule as a particular provisional sum with an appropriate brief description. A separate procurement procedure is normally carried out by the Procuring Entity to select such specialized Service Providers. To provide an element of competition among the Tenderers in respect of any facilities, amenities, attendance, etc., to be provided by the successful Tenderer as prime Service Provider for the use and convenience of the specialist contractors, each related provisional sum should be followed by an item in the Activity Schedule inviting the Tenderer to quote a sum for such amenities, facilities, attendance, etc.

These Notes for Preparing an Activity Schedule are intended only as information for the Procuring Entity or the person drafting the tendering document. They should not be included in the final documents.

PERFORMANCE SPECIFICATIONS AND DRAWINGS

(Describe Outputs and Performances, rather than Inputs, wherever

possible) Notes on Specifications

A set of precise and clear specifications is a prerequisite for Tenderers to respond realistically and competitively to the requirements of the Procuring Entity without qualifying or conditioning their Tenders. In the context of international competitive Tendering, the specifications must be drafted to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, and performance of the goods and services to be procured. Only if this is done will the objectives of economy, efficiency, and fairness in procurement be realized, responsiveness of Tenders be ensured, and the subsequent task of Tender evaluation facilitated. The specifications should require that all goods and materials to be incorporated in the Services be new, unused, of the most recent or current models, and incorporate all recent improvements in design and materials unless provided otherwise in the Contract.

Samples of specifications from previous similar projects in the same country are useful in this respect. The use of metric units is encouraged. Most specifications are normally written specially by the Procuring Entity to suit the Contract in hand. There is no standard set of Specifications for universal application in all sectors in all countries, but there are established principles and practices, which are reflected in this document

There are considerable advantages in standardizing General Specifications for repetitive Services in recognized public sectors, such as education, health, sanitation, social and urban housing, roads, ports, railways, irrigation, and water supply, in the same country or region where similar conditions prevail. The General Specifications should cover all classes of workmanship, materials, and equipment commonly involved in the provision of Services, although not necessarily to be used in a particular Services Contract. Deletions or addenda should then adapt the General Specifications to the particular Services.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for goods, materials, Services, and workmanship, recognized international standards should be used as much as possible. Where other particular standards are used, whether national standards of Kenya or other standards, the specifications should state that goods, materials, Services and workmanship that meet other authoritative standards, and which ensure substantially equal or higher quality than the standards mentioned, will also be acceptable.

If technical alternatives for parts of the Services are permitted in the tendering document, these parts shall be described in this Section.

These Notes for Preparing Specifications are intended only as information for the Procuring Entity or the person drafting the tendering document.
